JOB POSITION: TECHNICAL PROPOSAL

Bonatti is an International General Contractor which provides Engineering, Procurement, Construction and Operation & Maintenance Services to the Oil & Gas and Power Industry. We execute challenging projects under the most critical environmental and logistical conditions in remote locations, combining innovation and advanced technologies to secure our Clients' successes.

Our Mission is to achieve the satisfaction of our Clients, and to be welcomed in the Countries where we operate as a services supplier who is fully integrated with the territory, the community and the environment.

We are currently recruiting for a Technical Proposal with medium/high level of French speaking for our Oil & Gas Projects

Mission:

This position is responsible for developing proposal plans/tenders for Oil & Gas projects.

He will coordinate the preparation of all the necessary procedures for the tender, managing technical and commercial aspects.

He will analyse contract requirements and conditions, and he will define tender cost, risks and schedule.

Requirements:

- A Bachelor's Degree in Chemical or Mechanical Engineering
- Technical aptitude is required – candidates must be proficient with the usage of basic CAD
- Fluent in English and French
- Strong Technical Writing Skills
- Willingness to travel internationally

Work location: Parma
